Logo

FORMATS

When using the logo on a white background, the primary logo should be used. The reversed versions of the logo are to be used when placing the logo on a solid color background.

The space around the logo is to be no less than 1/4 of its height.

Logo

PLACEMENT

Wherever possible, place the logo in the top left corner of documents. To keep the logo separate from the contents of the document, it is often placed in a white container of its own, which spans the width of the page.

Logo

PLACEMENT

In rarer cases, the logo can be placed over imagery if it is most effective to do so. In this case, the primary logo should be positioned on a spacious, light coloured area of the image.

The reversed logo should be positioned on a spacious, dark coloured area of the image (example: front page of this document). No complicated areas of the photography should be obscuring the logo for optimum legibility.

BRAND IMAGERY

There are 3 sets of photography: Corporate, Education and Product. The Corporate and Education shows are taken from different perspectives of people engaging with wePresent technology.

Where possible, the product shots must include a screen in the background to give context.

CORPORATE PHOTOGRAPHY

EDUCATION PHOTOGRAPHY

PRODUCT PHOTOGRAPHY

PLACEMENT

The photographs have been taken using a high depth of field which gives a slightly blurred out background. The lack of detail in these areas makes it more suitable to apply text over the top. Where necessary, photographs are extended outwards to create copy space.
